-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) Responsive to communication(s) filed on 8/16/04 (Response).
- 2a) This action is FINAL.                            2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Response***

1. Receipt is acknowledged of the response filed on August 16, 2004. In the response,  
5 without amending any claims, Applicant traversed the rejection made in previous Office Action.  
Currently, claims 1-20 remain for examination.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the  
10 basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention  
15 thereof by the applicant for patent.

3. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Rensel (US  
6,036,179, hereinafter “Rensel”).

Rensel teaches a data system (see figure 6) comprising an elastomeric product 22 having  
20 a receiving portion for radio frequency device 27 (col. 4, lines 37+; col. 4, lines 63+). As shown  
in figure 5, the transponder is further comprised of a microchip 33, a battery 28, and antenna 36  
for communicating with a hand held unit 54A.

4. Claims 16- 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kulka et al.  
(US 5,483,827, hereinafter “Kulka”).

Kulka teaches a data system comprising an active integrated circuit transponder installed on an elastomeric product (see abstract; col. 2, lines 56+; col. 4, lines 44+). The elastomeric product 68 (see figure 7 and 8) is considered a spun material, and the radio frequency chip can be installed in a pocket 7 (or an encapsulating medium) (col. 4, lines 55+). The encapsulating material is a cured rubber. The data transmitting apparatus can be integrally installed or 5 detachably installed as disclosed in figures 7 and 8 (col. 7, lines 40+).

***Allowable Subject Matter***

5. Claims 10-15 are objected to as being dependent upon a rejected base claim, but would 10 be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: the claims are directed at a transponder moveably implanted into a pocket on a spindle sleeve. As disclosed in the reference to Aslam, and previously cited references to Epstein and Kleinfelter, a 15 data system comprising an elastomeric product is well known in the art. However, the references, taken alone or in combination, fail to suggest or teach a particular structure wherein the sleeve comprises a sealable pocket and a toothed profile as set forth in the claims.

***Response to Arguments***

- 20 7. Applicant's arguments filed on August 16, 2004 have been carefully considered. Examiner notes Applicant's argument, particularly regarding a pocket as recited in claim 16. As indicated above, a new reference is cited disclosing, in the Examiner's opinion, the subject matter regarding the pocket. In view of the above, this Office Action is made non-final.
